Professional Summary

Passionate Python Full Stack Developer with 1 year of experience in designing, developing, and debugging scalable web applications using Django, and Machine Learning. Skilled in building AI-powered solutions, real-time data processing, and analytics-driven platforms. Seeking an opportunity to leverage my expertise in full-stack development and AI to create innovative, high-impact applications.

Technical Skills

Language: Python

Webtools/Frameworks: HTML, CSS, Bootstrap, Java script, Django,

Database : Mysqlite, Mysql

Familiar with: Datascience , React JS , Python Libraris ,

Soft Skills:Good Communication,Time Management, Team work,Leader ship, Punctuality

Experience

Datavalley.Ai

05/06/2024

Full Stack Python (Jr. Software Engineer)

Vijayawada, Andhra Pradesh

- Developed service projects to perform a set of tests daily on a product in development, reducing the time required for team members to identify and fix bugs/issues.
- Implemented scripts using Python and PowerShell to aggregate Django results into an organized format and automate the process of loading the latest build code onto the hardware for daily testing.
- Utilized Django to provide a continuous integration service, automating the process of code deployment, test execution, and result reporting.
- Applied Data Science and Machine Learning techniques to analyze test results, identify patterns in software bugs, and improve predictive maintenance strategies.
- Worked with Python libraries such as Pandas, NumPy, and Scikit-learn to preprocess and analyze test data, enhancing debugging efficiency.

Projects

Blockchain on E-Voting Done Right | *Python, Block chain*

Apr 2024

- * Developed a secure e-voting system using blockchain technology to ensure voter privacy and election transparency.
- * Technologies Used: Ethereum, Smart Contracts, Solidity, and cryptographic techniques.
- * Achievements: Successfully created a tamper-proof voting system with transparent audit trails.
- * Outcome: Demonstrated improved trust and integrity in the voting process through a public blockchain.

House loan prediction | *Python, Machine Learning*

Aug 2021

- Developed a machine learning model to predict whether a loan application would be approved using the House Loan Prediction Dataset by Kaggle.
- Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- Developed a model that achieved an accuracy of 90 percent on the test set, which is significantly higher than the baseline accuracy of 50 percent ,this model is used to make loan approval decisions.
- **Tools and Technologies:** Python, NumPy, Pandas, Scikit-learn,Matplotlib.

Personal Portfolio Website | *HTML, CSS, JavaScript*

Feb 2025

- Designed and developed a responsive personal portfolio website to showcase projects and skills.
- Implemented interactive UI elements using JavaScript for an enhanced user experience.
- Ensured cross-browser compatibility and mobile responsiveness using CSS media queries.
- Optimized website performance by reducing load time and improving accessibility. [Live Project Link here](#)

DIY Crafting Website | *HTML, CSS, Bootstrap, JavaScript*

Feb 2025

- Designed and developed a DIY crafting website with an interactive and responsive UI using Bootstrap.
- Implemented dynamic content and animations using JavaScript to enhance user engagement.
- Integrated a user-friendly navigation system and media galleries to showcase various craft ideas.
- Ensured cross-browser compatibility and mobile responsiveness for a seamless experience.

Zoom-Clone-App | *HTML, CSS, JavaScript, Django, Channels, Redis, WebRTC*

Dec 2024

- Developed a real-time video conferencing application inspired by Zoom using WebRTC and Django Channels.
- Implemented WebSockets for seamless real-time communication and Redis for efficient message brokering.
- Designed an intuitive and responsive UI using HTML, CSS, and JavaScript to enhance user experience.
- Integrated features such as user authentication, screen sharing, and chat functionality.
- Optimized application performance for low-latency video and audio streaming.

Education

St.Marys Group of institutions Guntur,chebrolu(7.53/67.84)

Jun 2020 - May 2024

*Artificial intelligence and Data science(Bachelor of Computer Science Engineering)**Guntur, Andhra pradesh*

Narayana Junior College(81.1)

Jun 2019 Apr 2020

*M.P.C**Mangalagiri, Andhra Pradesh*

Nirmala English Medium High school(7.8)

May 2018

*10th(SSC)**Mangalagiri, Andhra Pradesh*

Certifications

- A certified course on Power BI for Beginners from SimpliLearn. 19th Sept 2024
- A certified course on Full stack Development From Datavalley.AI Feb-May2024
- A certified badge on “PYTHON101(PYTHON WITH DATA SCIENCE)” conducted by IBM
- A certified badge on Microsoft Azure AI Fundamentals certified NO: I723-3524 April 2023
- A certified course on Salesforce Developer from APSCHE. Aug-Oct 2022
